

Now available! Omnipod® 5 Automated Insulin Delivery System

What's New:

SmartAdjust™ technology
Every 5 minutes, the system automatically increases, decreases, or pauses insulin delivery based on your customized target glucose—helping to protect against highs and lows, day and night.^{1,2}

Activity feature
Activity with a few finger taps. When using the Activity feature, Omnipod 5 reduces insulin delivery when glucose typically goes low, like when exercising.

SmartBolus calculator
The only AID system with a built-in bolus calculator that automatically incorporates your CGM data and trend, so you don't have to.

3 Simple Parts

To the Omnipod 5 Automated Insulin Delivery System

Pod and Dexcom G6 shown without the necessary adhesive.

What's Still True:

No more multiple daily injections
No more multiple daily injections when managing insulin.

Waterproof* device
Wear the Pod in the shower, the ocean, or running in the rain.

*The Pod has an IP28 rating for up to 25 feet for 60 minutes.

No tubes to get in the way
Walk freely through every open door, leaving doorknobs in your dust. No belts, fanny packs, or pockets required.

Omnipod® 5 Tubeless, automatic insulin adjustments

Omnipod 5, the first and only tubeless, automated insulin delivery system to integrate with Dexcom G6, is now available. Omnipod 5 helps simplify life with diabetes: no multiple daily injections, tubes, or fingersticks* necessary!

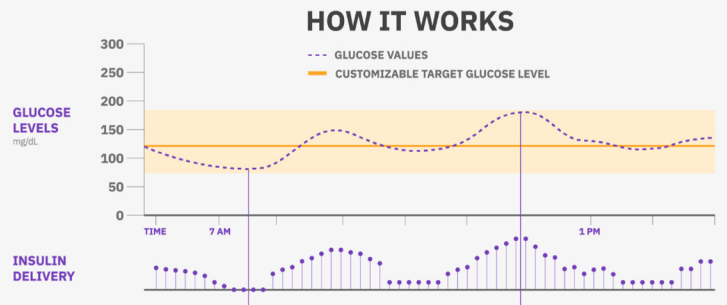

- Cleared for people with type 1 diabetes aged 2 years and older
- Helps keep you in range day and night^{1,2}
- Monitor your glucose levels and insulin dosing all with the option for full control right from your compatible smartphone†.
- Just like Omnipod DASH®, it includes a waterproof‡ tubeless insulin Pod that can be worn almost anywhere you'd inject insulin.
- Each Pod still lets you trade multiple daily injections for up to 3 days (72 hours) of continuous insulin delivery.

Now, the Pod is automated, CGM integrated, and highly anticipated—helping to simplifying life in so many ways.

*Fingersticks required for diabetes treatment decisions if symptoms or expectations do not match readings.
†For a list of compatible smartphone devices visit omnipod.com/compatibility.
‡The Pod has an IP28 rating for up to 25 feet for 60 minutes. The Controller is not waterproof.

Always adjusting, so you don't have to

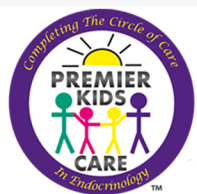

With SmartAdjust™ technology, Omnipod 5 and the Dexcom G6 CGM* are in constant communication, enabling automatic insulin adjustments to help improve time in range.^{1,2}

HELPS PROTECT AGAINST LOWS^{1,2}
When your levels are dropping, SmartAdjust™ technology automatically decreases or pauses insulin delivery.

HELPS PROTECT AGAINST HIGHS^{1,2}
When your levels are rising, SmartAdjust™ technology automatically increases insulin delivery.

* Dexcom G6 App is needed to control the G6 CGM
